

CAPABILITIES SUMMARY

BATCHING & BLENDING

- Capable of mixing dry and liquid ingredients with paddle and high shear equipment.
- Private well sourced water filtered by reverse osmosis and (if needed) ozonation.
- Technblend® blenders offer consistent quality and improved ingredient yield. Single strength filling also available for products such as wine and hard cider.
- Velcorin® dosing available for "clean label" preservation of beverage, as well as traditional preservation ingredients.

CARTON PACKAGING

Full wrap paperboard cartoning capabilities for all can sizes ranging from 2x2 4 packs on up.

CASE PACK FINISHING

Multiple loose configurations in cardboard tray with shrink film overwrap for both cans and PET bottles.

ONSITE LABORATORY

We test each finished beverage for presence of yeast, mold, or bacteria, as well as brix, CO2 level, total air content, ph, and total acidity.

WAREHOUSING & TRANSPORTATION

Finished goods warehousing available at the rate of \$5.00 per pallet per month beginning with the second month after initial production. See separate "Warehousing rates" memo for full warehousing program. Regional transportation is available at competitive pricing from Noel Transportation.
